

GRACEWORKS APRIL VACATION: RADICAL RECYCLING!!

From April 15th-19th, come join us at GraceWorks for a week of recycling fun, turning trash into unique treasures and performing science experiments! We'll be taking every day materials that would normally be thrown out or recycled and make them beautiful and FUN-ctional!

Monday, April 15th:

It's time for a classic favorite: THE EGG DROP!! We'll take tons of recyclable materials and repurpose them into shelters for our eggs, then drop the creations from various heights, seeing who's can withstand the impact! We'll also be using our imaginations to come up with different simple machines or inventions we can create with recyclable materials!

Tuesday, April 16th:

We're getting creative with cardboard today! From pinatas to chic yarn-wrapped letters to ramps and racetracks we'll be finding cool ways to utilize a material we normally just toss in a recycling bin. We'll also be taking part in 'Imagination Builders' at the Medford Public Library, where we'll come up with fabulous cardboard creations!

Wednesday, April 17th:

It's all about plastic today! We'll take water bottles and turn them into gorgeous flowers, bracelets, planter pots and even bowling pins for our disco bowling party in the afternoon!

Thursday, April 18th:

We're heading off to the Harvard Museum of Natural History! We'll get to meet a Harvard Graduate student scientist, who will tell us about their work and environment, and explore the wonders of the museum!

Friday, April 19th:

We'll be exploring our natural world for materials today! We'll take a walk through Medford and collect rocks, sticks, flowers, grass, etc. to create paint brushes, suncatchers, and more! We'll use our microscope to get a closer look at what we find, and watch 'The Lorax' in the afternoon.
